1 INTRODUCTION

Write your introduction here. You can cite bibliography like this (Stefanelli 2017) or in text like Stefanelli (2017), if you provide a BibTeX file with references. See http://rmarkdown.rstudio.com/authoring_bibliographies_and_citations.html for more information. Or you could also use [knitcitations](#).

You can even specify the desired output format for your bibliography by including a style file for a specific journal (e.g. “ecology.csl”). Many different bibliography styles (CSL files) can be obtained at <http://citationstyles.org/> or <https://github.com/citation-style-language/styles>.

2 METHODS

2.1 Study Area

We worked in a beautiful place with lots of trees, like *Quercus suber* and *Laurus nobilis*.

2.2 Data collection and analysis

We applied a linear model where

$$y_i = \alpha + \beta * x_i$$

25 **3 RESULTS**

26 Trees in forest A grew taller than those in forest B (mean height: 25 versus 13 m). And many more
27 cool results that get updated dynamically.

28 **4 DISCUSSION**

29 Discuss.
